

# 2-4\* week study start-up for your simple study designs

ClinPhone 5 is our highly configurable solution ideal for simple study designs, enabling accelerated study delivery. Supporting patient and clinical supply management, this new offering from Perceptive eClinical provides the security, technology, and value you expect from the pioneers of RTSM.

## Accelerated delivery of a Randomization & Trial Supply Management solution for your simple study designs, including:

- ▶ **Core Customizable RTSM:** configurable platform with a core of pre-validated functionalities which best serve the needs of your simple protocol designs.
- ▶ **Randomization:** blocked randomization with stratification by multiple factors.
- ▶ **Trial Supply Management:** inventory management procedures from storage to disposal. Buffer-based site resupply, automatic drug delivery requests & expiry management.
- ▶ **Medication assignment:** automated one-click randomization & drug assignment. Patient dispensing of kits or various combinations of drug, quantity, and dose.
- ▶ **Unblinding controls:** built-in process with or without Sponsor authorization.

## Key Benefits:

- ▶ Accelerate your research timeline with quick study set-up, allowing you to start gathering data and insights.
- ▶ Enjoy peace of mind with a reliable, pre-validated system that can be easily customized to meet your specific study requirements, ensuring accuracy and compliance.
- ▶ Simplify your study set-up with a comprehensive suite of standard functionalities, making it easy to tailor to your study needs without starting from scratch.
